

Curriculum Vitae Andrew Romashkin

Personal information

Name : Andrew Romashkin
Telephone : +381 61 131 00 99
Email : andrewromash@gmail.com
Age : 34
Location : Belgrade, Serbia
Linkedin : [andrew-romashkin-79761a171](https://www.linkedin.com/in/andrew-romashkin-79761a171)
Github : [RomashkinAndrew](https://github.com/RomashkinAndrew)

Profile

I have 10 years of software engineering experience mostly with desktop C#, but I've also got expertise in web development (ASP.NET/Blazor), microcontroller firmware (C) and frontend (WPF).

Employment terms

Looking for fully remote positions or on-site positions within Serbia. Salary is discussable and depends on the country, employment type and other parameters.

Work Experience

Freelance

C#/WPF/Blazor Developer

March 2024 – Present, Remote

Technologies: C#, WPF, Blazor, communication protocols

Various freelance assignments, mostly with the Virtual Marriage project (see below).

Sioux Technologies

March 2023 – March 2024, Eindhoven, Netherlands

Senior Software Developer

Technologies: C#, WPF, Excel

- D2I project: a fleet management solution for TFS electron microscopes. Our team developed a battery of algorithms for extracting useful information, such as diagnostics, from raw telemetry data. My primary task was the development of a comprehensive tool for analyzing algorithm logs, and for the aggregation, storage, and visualization of their run statistics, such as successful and failed runs, categorizing exception types, and identifying special cases such as saved state losses.
- Various small-scale internal/support projects.

Pradix Studio

April 2022 – February 2023, Belgrade, Serbia

Lead C#/Unity Developer (part-time)

Technologies: C#, Unity

- Creation of an AI and a mathematical model of game balance for mobile games;
- Code review, quality control and mentoring of the junior developer.

Zyfra Mining (former VIST Group)
C# Developer

May 2017 – March 2022, Moscow, Russia

Technologies: C#, C, WinForms, communication protocols (TCP/IP, RS232/485, CAN etc.)

Main responsibilities:

- Software development for onboard equipment for [underground mines](#) and [open quarries](#) (consisting of hardware, software and sensors). Connected and integrated with installed geological & mining informational systems. Building features and functionality. Implementation of the solution at customer's facility.

Major achievements:

- Underground railway: solely responsible for the implementation of the software module for the underground railway control. Implemented on 3 mines, currently processing about 20% of world's supply of palladium and 10% of nickel;
- IPan (intellectual panel): contributed to development of the intellectual panel – onboard computer, now installed on thousands of units of industrial machinery (trucks, excavators, drills, refuellers etc., both surface and underground). IPan handles data from machine's sensors, calculates various performance indicators, handles shift tasks, etc. More than 80 implementations all around the globe.

Virtual Marriage
C#/WPF developer (freelance)

Sep 2017 – Present, Remote

Technologies: C#, WPF, communication protocols (RS232, CCTalk, MDB etc.), Blazor, ASP.NET, Entity Framework

Main responsibilities:

- Development and maintenance of [kiosk](#) software for a network spanning over multiple countries. Kiosk has following features: 2 mini games, ability to print photos from Instagram, up to 4 good dispensers, photo printer, fiscal receipt creation, statistics server;
- Hardware debugging;
- Creation of a web administration panel (ASP.NET, Blazor, Entity Framework)

Sensis Kiosk Solutions
C#/WPF Software Developer

August 2015 – March 2017, Moscow, Russia

Technologies: C#, WPF, communication protocols (RS232, CCTalk, MDB etc.)

Main responsibilities:

- C development for Atmel microcontrollers and C# desktop development, mostly for payment and kiosk solutions.

Major achievements:

- [Sensis instamat](#) - a kiosk for printing Instagram photos;
- Firmware for various controllers, protocol converters etc.

Moscow Television Research Institute
Software Developer (part-time)

May 2014 – February 2015, Moscow, Russia

Technologies: C#, C, communication protocols (RS232, Manchester)

Main responsibilities:

- C microcontroller development (Cortex-M1 Milandr 1986VE1T)
- C# testing software development

Personal project on Github

[TrulyRandom](#)

Technologies: C#, Cryptography, Mathematics

I have a strong interest in cryptography, especially random numbers in cryptography.

Description:

An open-source .NET library for generating and testing high-quality truly random data for cryptographic applications using consumer hardware. Includes easy-to-use implementation of the [NIST SP 800-22](#) test library. The library allows developers to retrieve low-entropy data from microphones, cameras and user input (mouse and keyboard), process this low-entropy data into high-entropy using various randomness extractors, test it using a library of tests, store and retrieve it and finally use it to get random data of various types.

Education

September 2013 — February 2015	Computer Software Engineering (Engineer degree) MPEI (Moscow Power Engineering Institute)
September 2009 — June 2013	Computer Software Engineering (Bachelor degree) MPEI (Moscow Power Engineering Institute)
September 2010 — February 2012	Translator in the field of professional communication (German language) MPEI (Moscow Power Engineering Institute)

Technical Skills

- Programming languages: C# (*core skill*), embedded C, Java (*familiar*), Delphi (*familiar*), C++ (*familiar*)
- Frontend: WPF
- Web: ASP.NET, Blazor, Entity Framework
- Frameworks: .NET Framework (2.0-4.7), .NET Compact Framework (2.0-3.5), .NET/.NET core (3.1-7.0), WinForms, WCF
- Databases: SQL, SQLite, SqlServer
- Source code control: Git, SVN
- Communication protocols: TCP/IP, RS-232/485, CAN, CCNet, MDB, REST APIs (*familiar*)
- Testing: unit tests (MSTest, NUnit)
- CI/CD: GitHub Actions, Azure DevOps (*familiar*), Jenkins (*familiar*), Docker/Kubernetes (*familiar*)
- Management: Agile/Scrum, Jira
- Mathematics: cryptography (*strong affinity*), probability theory (*familiar*), discrete (*familiar*), mathematical analysis (*familiar*)
- Markup: JSON, XML, XAML, UML, HTML(*familiar*)
- Operating systems: Windows, Unix

Language skills

English: C1
Dutch: B1
Russian: native speaker
German: previously B2

Recommendations

Sioux Technologies, Zyfra Mining (available by request)

Miscellaneous

Professional interests: cryptography, industrial applications, physics, mathematics

Personal interests: aviation, travelling, intellectual games, sports: powerlifting and motorcycle racing
