

Novikov Kirill

Russia | **Open to relocation**

[Gmail](#) | [Telegram](#) | [LinkedIn](#)

4+ years of experience building high-load, scalable systems using microservice architecture. Skilled in designing fault-tolerant services and low-latency algorithms. Experienced in leading engineering teams (3+ developers) and participating in hiring processes, including candidate evaluation and technical interviews.

Skills: Java/Kotlin, Spring, Docker, Kubernetes, Microservices, Event Sourcing, CQRS, gRPC, Kafka, Redis, SQL, NoSQL, Istio, CI/CD, TDD, JUnit, Mockito, Testcontainers, Jira, Nexus.

PROFESSIONAL EXPERIENCE

[SberTech](#) | Senior Java Developer | Russia | May 2024 - Present (2 years 1 month)

SberTech builds core technology for Sberbank - the largest bank in Russia serving **111M+** clients, with **87M+** monthly active users across its online services.

- Designed and delivered routing components for the Platform V Application Sharding product.
- Led development of RTEF - a high-performance routing service directing users to target environments based on dynamic strategies.
- Led 2 developers + 1 DevOps, conducted technical interviews and made hiring decisions.
- Built and maintained CI/CD pipelines in Jenkins, reducing deployment time and stabilizing delivery.
- Designed and implemented REST APIs and core business logic (Java 17/21 + Spring Core/JDBC/Web).
- Configured Docker, Kubernetes manifests, and Istio routing, performing staging deployments.
- Collaborated with architects, analysts, and operational teams, ensuring stable high-load production work.

Stack: Java 17/21, Spring Framework, Kafka, PostgreSQL, Docker, Kubernetes, Istio, Helm, Jenkins CI/CD, JUnit, Mockito, Jira, Bitbucket, Nexus, SonarQube

Infotech | Full Stack Developer | Russia | February 2022 - May 2024 (2 years 4 month)

Infotech builds large-scale digital platforms for government agencies (social welfare, agriculture), with **1,000+** active users (managers/operators) who process citizen data. The systems handled data and requests of **3M+** end users across multiple regions

- Developed backend services and REST APIs in monolithic and microservice architectures.
- Built frontend modules using Angular + TypeScript used by 1,000+ daily operators.
- Integrated state systems through SMEV, enabling automated processing of citizen requests.
- Designed reporting & document-generation services (PDF/Excel) used in high-volume workflows.
- Improved CI/CD in Jenkins, increasing delivery stability and reducing build failures.
- Collaborated closely with analysts and government representatives.
- Wrote unit and integration tests, improving code reliability across large modules.

Stack: Java 8/17, Spring Boot, Angular, TypeScript, PostgreSQL, Docker, Kafka, Jenkins, JUnit, Mockito

KNStudio | Android Developer | Russia | July 2022 - February 2024 (2 years 8 month)

Android developer with **5M+** total downloads across all applications on Google Play

- Developed, published, and maintained multiple applications using Kotlin + Android SDK.
- Executed ASO strategies, increasing organic installs and visibility in the store.
- Integrated monetization via AdMob, AppLovin, Mintegral, FAN, Yandex Ads, CAS.
- Full app lifecycle: development - release - analytics - updates.

Stack: Kotlin, Spring, Android SDK, Firebase, ASO, Ad Networks

EDUCATION

Samara State Aerospace University (SSAU)

Specialist's Degree in Automatic Systems for Power Plants | Russia | 2008 - 2014

LANGUAGES English (A2 - in progress) • Russian

HOBBIES Self-development & learning • Football • Hiking • Spending time with family
