SUMMARY

AppSec and DevSecOps Engineer with 5 years of overall experience in Information Security (SOC, Incident Response, Pentesting). Specialized in Web Application Penetration Testing (WAPT), vulnerability assessment, and security automation. Experienced Blue Team player (The Standoff) with hands-on expertise in WAF configuration and incident mitigation. Regular CTF participant focusing on Web and Reverse Engineering.

EXPERIENCE

Greenatom

DevSecOps

December 2024 - Present, Nizhny Novgorod

Greenatom is an IT company that offers software development, project management, and artificial intelligence services.

- Configured and managed web application firewalls (WAF) and developed custom filtering rules to mitigate application-layer attacks (including successful defense experience in The Standoff as a Blue Team member).
- Led full-cycle deployment and configuration of MaxPatrol SIEM, onboarding complex data sources, including Kubernetes and CI/CD infrastructure logs.
- Set up, configured, and maintained automated vulnerability scanners to continuously assess the security posture of internal applications.
- Engineered internal automation tools (Python, Bash, PowerShell) to optimize incident response workflows and compliance reporting.
- Performed targeted WAPT assessments and vulnerability analysis based on OWASP Top 10.

Support Specialist

October 2020 - December 2024, Nizhny Novgorod

- Conducted real-time monitoring of security alerts and managed incoming incident tickets.
- Provided technical support and guidance to users during security events, ensuring prompt resolution and effective communication while maintaining high standards of service and operational security.

EDUCATION

Bachelor's of Infocommunication Technologies and Communication Networks

Moscow Technical University of Communications and Informatics (MTUCI) • Moscow • 2020

CERTIFICATIONS

Web Application Penetration Testing (WAPT)

Codeby • 2025

Reverse Engineering

Codeby • 2024

SKILLS

AppSec & Vulnerability Management: WAPT, OWASP Top 10, Vulnerability Scanners (MaxPatrol VM, OWASP ZAP), Threat Modeling

Defensive Security & Monitoring: WAF configuration, SIEM (MaxPatrol), Log Management, Incident Response

Security Automation & Scripting: Python, Bash, PowerShell, JavaScript, Custom Tool Development

Infrastructure & DevOps (Basic): Docker, Kubernetes, Linux
